

## Enterprise Productivity Suite for Cloud

---

*An integrated application suite that enables enterprises to secure their data in the cloud while leveraging the potential of mobile cloud computing.*

---

# Access your enterprise documents on cloud from anywhere

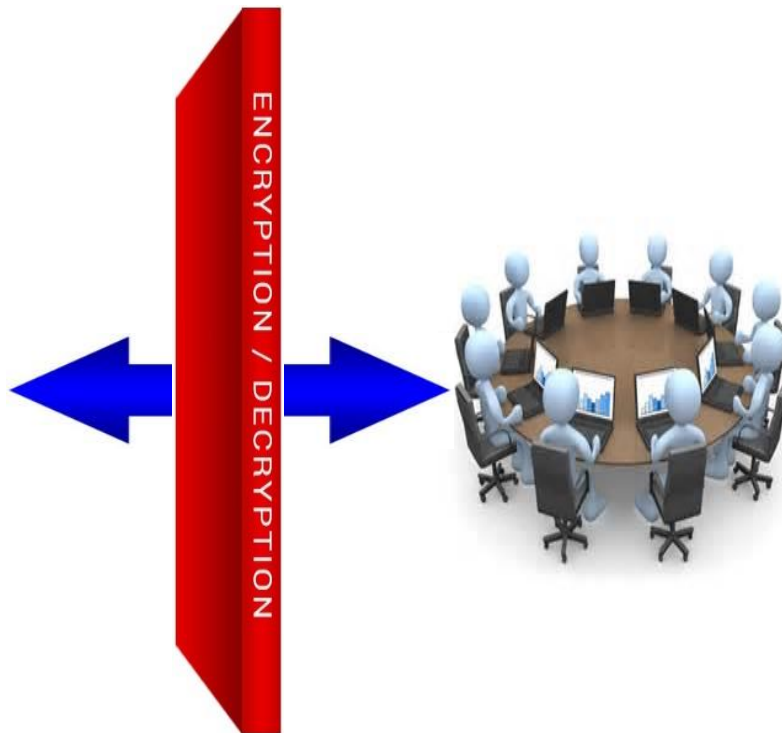

Create virtual drives for Dropbox, Google Drive, Box, SkyDrive or SugarSync on your smartphone, tablet or desktop.

View, edit and share files stored in the cloud the same way you do on your computer.

Save time and increase employee productivity.

# Take control of the security of your enterprise data

Creates a security layer on top of your enterprise data stored in the cloud using 256 bit AES encryption.

The additional security layer ensures that your enterprise data stored in the cloud is always protected—even if a hacking incidence or a data breach occurs on the cloud server.

## Sign & send PDF documents from anywhere

Sign & send your PDF documents from your smartphone, tablet or computer.

With only a few clicks, open documents from your email, sign them using your finger or stylus, and send them out through email or fax.

## Annotate PDF documents, Fill out PDF Forms

View, annotate and share PDF documents easily and hassle-free.

Highlight text, type or write comments, or insert pictures in your PDF documents.

Search, bookmark, print and fax. Fill out PDF forms.

# Create & edit documents anywhere

Create, edit and share documents from anywhere.

Rich text documents, spreadsheets, handwritten notes and voice memos.

## Scan, print and fax documents from anywhere

Use your smartphone or tablet as a portable scanner or fax machine.

Print documents to any wireless printer from anywhere.

Increase team productivity by providing convenience and flexibility.

## Manage business cards and contacts from anywhere

Scan, store and access your business cards from anywhere.

Synch-up your business cards and contact with Linked in and Google.

Share business cards electronically.

## SaaS-based architecture with minimal setup

Uses SaaS-based architecture which requires minimal setup and no up-front investment.

Integrated with all major cloud platforms and standard applications.

Pay-as-you-go. No long-term licensing contract.

## Award-winning customer support and consulting
